

Topic: India Needs Innovation

Date: 8th & 9th Sept 2017

Guest: Dr. Vikas Balia, Venue: Council Hall

Synopsis of the lecture:

On 9th September 2017, Dr. Vikas Balia discussed about the innovative thinking which is actually lacking in today's students. Innovation according to him is a better way of performing or looking at the regular things. He has given many examples on how innovative thinking has helped the society. He was sure about one thing that if a business is started using innovative thinking it is going to be helpful to the society in due course of time. He suggested that every science student should inculcate a habit of innovative ways of thinking in day to day life. He gave the examples of failure in businesses because of outdated ideas. Innovation should meet the right time for success. He also told not to give up due to failure as it may be surely a stepping stone towards the bigger success. He also added failure is not permanent but it is the beginning. He gave an excellent inspirational interpretation of the five ring symbols of Olympics. Overall, it was a brainstorming session for the students and he succeeded in communicating the idea of innovative thinking among students.

Session Incharge: Pallavi Marathe
